

**NAMA : SELLA PUTRI SARI**

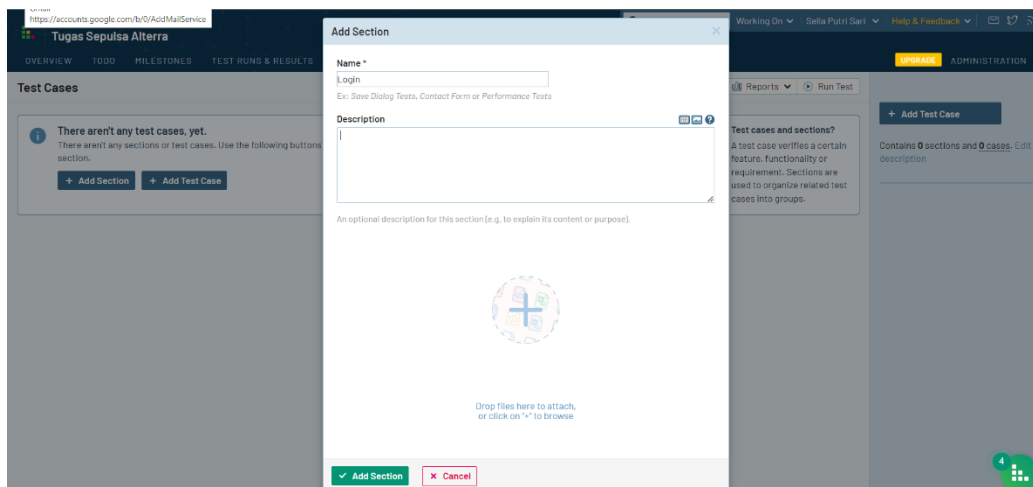

**KELAS : QE A**

## SOAL TEST CASE MANAGEMENT TOOLS

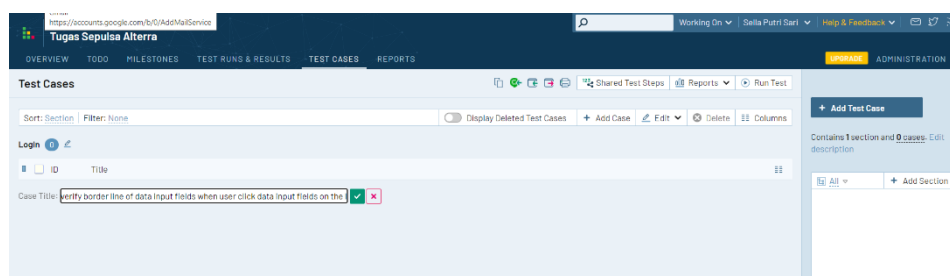

1. Klik Add Project, kemudian berikan nama project sesuai dengan tugas yang diberikan

2. Setelah Add Project, klik Test Case di bar navigasi kemudian tambahkan section pada Add Section

3. Setelah Add Section, maka akan muncul section Login. Tambahkan case dengan klik Add case pada section Login seperti dibawah ini

4. Selanjutnya edit case yang telah kita buat sebelumnya. Jadi untuk setiap case yang kita tambahkan, akan kita berikan detail-detail seperti gambar dibawah ini.

verify border line of data input fields when user click data input fields on the login form

Title \*

verify border line of data input fields when user click data input fields on the login form

Section \* Login Template \* Test Case (Text) Type \* Other Priority \* Low

Estimate References Automation Type None

- The user's device has connected to the internet and access
- already access with sepulsa web browser
- already access login form

The preconditions of this test case. Reference other test cases with [C#] (e.g. [C17]).

Steps

1. User connecting the device to the internet or WIFI
2. User access: <https://www.sepulsa.com/>
3. User click Masuk and the click Daftar
4. User click data input fields of register form

Actions

Delete a test case to remove it from its test suite. This also deletes all related running tests.

Delete this test case

People & Dates

Created Sella Putri Sari

5. Lalu setelah kita memberikan detail-detail diatas. Maka kita dapat melihat perubahan yang telah kita tambahkan sebelumnya

Test Cases

Sort: Section Filter: None

Login

ID	Title	Type	Priority	Estimate	References
C1	verify border line of data input fields when user click data input fields on the login form	Other	Low	None	None

Add Case | Add Subsection

Contains 1 section and 1 case. Edit description

Preconditions

- The user's device has connected to the Internet and access
- already access with sepulsa web browser
- already access login form

Steps

1. User connecting the device to the Internet or WIFI
2. User access: <https://www.sepulsa.com/>
3. User click Masuk and the click Daftar
4. User click data input fields of register form

Expected Result

a border line appears on the data input field

+ Add Test Case

+ Add Section

Login

6. Selanjutnya, setelah kita membuat semua section dan test case, maka kita akan membuat test plan seperti gambar dibawah ini

Add Test Plan

Name \* Sepulsa Website - Testplan

References

Milestone

Description

Use this description to describe the purpose of this test plan.

Please add test runs to this plan from the sidebar

For every entry and/or configuration you add to this test plan, Testfall automatically starts a corresponding test run.

+ Add Test Run(s)

+ Rerun Test Plan

7. Kemudian setelah kita membuat test plan, langkah selanjutnya kita membuat test run. Disini saya membuat test run pada section login, pilih produk dan pilih metode pembayaran.

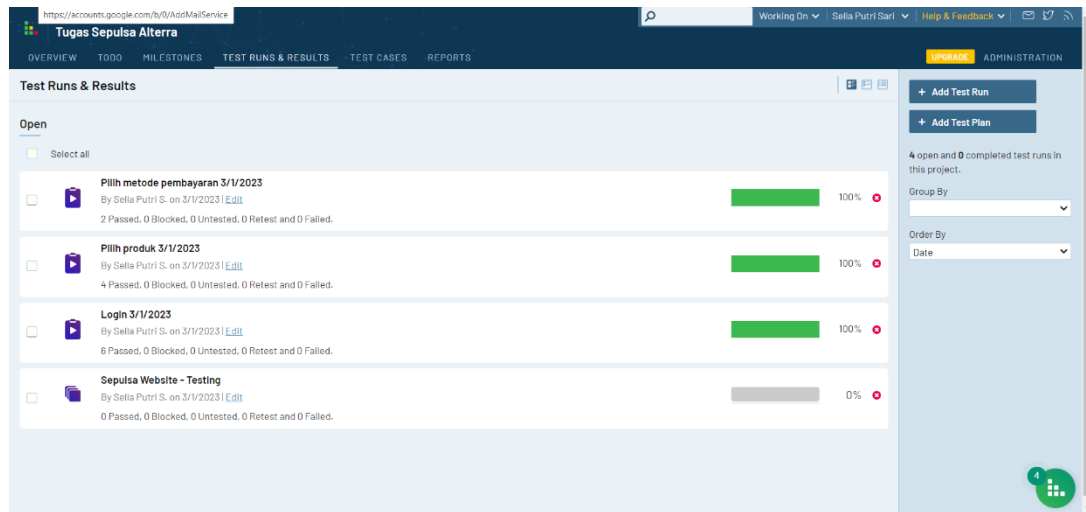

The screenshot shows the 'Add Test Run' form in TestRail. The form includes fields for 'Name' (with a default value 'Login 3/1/2023'), 'References', 'Milestone', and 'Assign To'. There is also a large 'Description' text area. On the right side, there is a file upload area with the text 'Drop files here to attach, or click on "+" to browse'.

The screenshot shows the 'Select Cases' dialog in TestRail. It displays a list of test cases under the 'Login' section, including 'verify border line of data input fields when click data input fields on the login form', 'input password on the field and click show password', 'user input the invalid email and invalid password', 'user input the invalid email and valid password', 'user input the valid email and invalid password', and 'user input the valid email and valid password'. The dialog also includes a 'Selection Filter' on the right and 'OK' and 'Cancel' buttons at the bottom.

8. Setelah test run terbuat maka kita akan menambahkan result, disini kita dapat melakukan perubahan pada case ketika case tersebut berstatus passed, failed dsb, lalu juga terdapat comment. Dikolom comment saya menambahkan result dari case yang saya buat beserta bukti gambarnya

The screenshot shows the 'Add Result' dialog in TestRail. It includes a 'Status' dropdown menu (set to 'Passed'), an 'Assign To' dropdown menu, a 'Version' field, an 'Elapsed' time field, and a 'Defects' field. There is also a 'Comment' text area where the user has entered 'Login successfully and direct to sepulsa backend'. The dialog has 'Add Result' and 'Cancel' buttons at the bottom. In the background, a table of test cases is visible, showing their status as 'Passed'.

9. Pada navigasi bar TEST RUN & RESULT, kita dapat melihat test run yang telah dilakukan. Disana terdapat Login, Pilih produk dan Pilih metode pembayaran.

10. Pada tampilan OVERVIEW dapat kita lihat grafik berapa case yang telah lulus, berapat case yang diblok, berapa case yang harus di test ulang dan berapa case yang gagal.
